PREFATORY NOTE

THIS seventy-sixth yearly issue of THE ENGLISH CATALOGUE OF BOOKS comprises the titles (under authors, and subjects or titles) of works published during 1912, and also of some received too late for inclusion in the seventy-fifth issue.

The main entry for each book begins with the author's surname (if known) in **heavy type.** As an index to these "Author" records, entries are also made under the titles, commencing with their most important words (which usually indicate the *subjects* with which the books deal), or with the first words; the name or word under which the main entry appears is printed in *italics* in these index entries, thus giving a reference to the place where the full information about a book may be found. Main entries and index entries are in one alphabet.

Writers with compound names are entered under the first part of the name, *e.g.*:—

Baring-Gould (Sabine)

and accordingly must be looked for in that order. References are also made, however, from the last part of the name.

The publications of learned Societies are recorded in an Appendix.

The names and addresses of the Publishers of Great Britain and Ireland, followed by those of the principal publishers in the United States and Canada, will be found at the end of the volume. The telegraphic and cable addresses and telephone numbers have been added when known.

Following the Preface is an analysis of the books of the year 1912, showing in detail the number of works in each class of literature, and giving the proportions of new books, translations, pamphlets, and new editions.

Hearty thanks are due to many publishers, secretaries, librarians, authors and bibliographers who have assisted in making this book more correct and comprehensive than it would have been otherwise.

The Editor will be glad to have particulars (author, title, size, price, publisher, and month of publication) of any work which may have been omitted. Information regarding each book should be given on a separate slip of paper or postcard. It should be addressed to *The Editor of* THE ENGLISH CATALOGUE OF BOOKS, "Publishers' Circular" Office, 19, Adam Street, Strand, London, W.C.

ANALYSIS OF BOOKS

PUBLISHED IN 1912

THE number of books recorded as having been published during the year is 12,067, a large increase on the total for any previous year in the history of British publishing. Last year (1911) the number recorded was 10,914, so that the current yearly increase is 1,153. The rate of production during the year has been fairly steady, without so much variation from month to month as in 1911. The months of September, October and November still hold pride of place as the most prolific, and October has established a new record by rising to the total of 1,740—which means that, on an average, during that month, 64 books were published every weekday.

This is the second year that the statistical table has been constructed on the lines of the classification scheme adopted by the International Congress of Librarians at Brussels in 1910, so that a comparison of each class of literature is possible. The increased publishing activity of 1912 has been distributed over nearly all classes of literature. The *increases* are as follows :—Philosophy, 59 ; Law, 1 ; Education, 61 ; Philology, 19 ; Science, 177 ; Technology, 61 ; Medicine, &c., 27 ; Agriculture, &c., 18 ; Domestic Arts, 52 ; Business, 47 ; Fine Arts, 29 ; Music, 31 ; Games, &c., 30 ; Literature, 160 ; Poetry and Drama, 53 ; Fiction, 249 ; Juvenile, 157 ; History, 62 ; Geography and Travel, 48 ; and Biography, 78. The *decreases* are :—Religion, 132 ; Sociology, 20 ; and General Works, 114. The largest increases are thus in Science, Literature, Fiction, and Juvenile Literature. It should be noted that in the above classes " Education " includes only books about educational theory and practice, and not text books on special subjects, which are classed elsewhere ; and also that under " Music " only works about music are recorded.

Large though the total for the year is, it would be possible to swell it to a much greater figure by the inclusion of numerous leaflets (Government and other), ephemeral pamphlets, the publications of Borough Councils and other local government bodies, and musical texts. The latter alone, if fully recorded, would require an annual volume rivalling *The English Catalogue* in size. The total would be greatly increased by the inclusion of all these items, but the figures would not represent so accurately the book publishing activity of the United Kingdom.

In the following tables each book is counted as one, whether it is in one or more volumes. Serials that appear later as a collected volume are counted as an ordinary book on the appearance of that volume ; so that, for example, the series of " Statutory Rules and Orders " issued by the Government, and amounting to several hundred in the year, are merely counted as one item on the appearance of the annual collected volume. The same rule applies to volumes of magazines, &c.

The analytical tables appended supply further detailed information regarding the year's publishing.

DIRECTORY OF PUBLISHERS

Publishers are invited to send us their Telegraphic Addresses and Telephone Numbers. Those sent will be found below between square brackets [ ], and separated from each other by a semicolon (;) The Editor will be glad to be notified of any inaccuracy in the following lists for correction in subsequent volumes.

This list of Publishers, with their Addresses, has been compiled principally with a view to supplying information regarding the books in the English Catalogue. This will explain the inclusion of some firms in the list who can scarcely, in the strict acceptation of the term, be called Publishers, since the publication of books forms only an occasional part of their business.
